What every lawyer should know about cyber security

Speakers' biographies

Richard Cumbley

Partner, London

Tel: +44 20 7456 4681

richard.cumbley@linklaters.com

Richard has advised clients on privacy related issues for over 15 years. He has worked on privacy projects across the globe including major data security incidents, appearances before regulators, contentious and large scale subject access issues, the privacy implications of new technology, online monitoring techniques (such as cookie matching), cloud computing and "big data". Clients for whom he has worked include Barclays, BP, Deloittes, Hyatt Hotels, JPMorgan, TicketMaster and WPP. He is co-author of the ICC's cookie compliance guide, endorsed by the UK Information Commissioner's Office, a member of the ICC's technology committee and the IAPP's publications board. He is listed by Chambers & Partners as in the first tier of data protection advisers in the UK.

Peter Church

Senior Associate, London

Tel: +44 20 7456 5495

Peter.church@linklaters.com

Peter has advised clients on technology issues for over 15 years, having previously studied computer science at Cambridge University. His practice encompasses a wide range of areas in which technology interfaces with the law including data privacy, telecoms regulation and technology contracts. He has spent time on secondment at Dixons, Vodafone and BT. He is editor of Data Protected, a review of data protection laws across 52 jurisdictions around the world, and is part of the Society of Computers & Law's Big Data committee..

Doug Twining

Head of ISS Strategy, Planning, Solution, London

Tel: +44 20 7456 4195

doug.twining@linklaters.com

Doug is the head of ISS Strategy and Planning for Linklaters and has specific responsibility for IT security. Doug joined the firm from BP where he was head of IT strategy and where he latterly ran a global security programme which included improving cyber-security protection and detection.
